PROJECTS

• FULL STACK ECOM USING JAVA SPRINGBOOT

Engineered a scalable e-commerce platform utilizing Java Spring Boot and MySQL, facilitating secure user transactions and enhancing the online shopping experience.

• OBJECT-ORIENTED BANKING SYSTEM

Designed and implemented a Banking System utilizing object-oriented programming (OOPs) principles in Python to facilitate secure customer account management, transaction processing, and data integrity.

• AAWARDS FEATURED DESIGN AGENCY REIMAGINE

Developed a web application replicating the design and functionality of an award-winning design agency website, utilizing HTML, CSS, and JavaScript to enhance front-end development skills.

LEADERSHIP & ACHIEVMENTS

- Achieved an impressive 9.1 CGPA in the first year of college.
- Led my team in the Hack2skills Hackathon, fostering innovation and strategic problem-solving to develop a competitive solution.
- Active member of the Mental Health Society (Kafila), contributing to initiatives that promote awareness and well-being within the community.
- Served as Battalion Captain in Scout & Guide camps at SF DAV Public School, demonstrating leadership, teamwork, and resilience in organizing and guiding peers.
